Analysis of LIFE Programme Budget Spent on Public Research in Plant Science 2013/14

We searched for projects in which the main beneficiary was a 'University' or a 'Research Institution' as defined by the official European Commission project descriptions. From these projects we calculated the percentage of the call budget granted to public research institutions. We then filtered those projects relevant to plant science and performed the corresponding calculations. Public research institutions may be partners in other projects as associated beneficiaries.

Analysis of LIFE call for proposals 2014
